Practice Task 1

- Create a basic HTML page structure with the doctype, html, head, meta, title and body tags

- The title will be "My Travel Blog"

- Add comments to the code to explain each section. For example, "this is the head section"

Practice Task 2

❑ Create a heading tag that will have the text "My

iamalaminbiswas103@gmail.com

Travel Blog"

❑ Format the text in your heading tag using italic

Practice Task 3

❏ Create a div and inside the div create a paragraph.

Write about your experience.

❏ Add a button having the text "Read More"

Practice Task 4

- ❏ Create a span tag which will be outside the div. It will have the text "What I bought"

- ❏ Format the text in your span tag bold.

- ❏ Create an ordered list of things you bought from the place you visited

- ❏ Create another span tag with the text "My favourite food" and make it bold

- ❏ Create an **unordered list** of your favourite food you ate in that place

Practice Task 5

❏ Insert an image of your favourite food using the

img tag and add the src, alt, width, and height

attributes to it.

iamalaminbiswas103@gmail.com

Practice Task 6

❏ Create a link to your favourite song you listened to

while travelling using the anchor tag and add the

href and target attributes to it. Copy the URL link

from YouTube.

Use line breaks \<br\> where necessary

Module 1

HTML ——— HyperText Markup Language

1-2

P ——— Tag Paragraph tag

b ——— bold tag → not like that

strong ——— strong tag
↳ something important

note ——— tag এর content নতুন কোনো tab/ enter press.

strong semantic (meaningful) tag

i ——— italic tag

em ——— emphasize tag ——— italic like
   semantic

1-3

Heading tag

h1 — h6 ——— heading

small ——— small
   ↳ semantic

span ———

.li ──── list item

List করলে ব্যাবহিক একটা নেল- থ্য.ব - সাথে
indent করে ।

ul ────────→ unordered list ──── container

ol ──── ordered list ──── container

div ──── division tag ──── container

br ──── break

button ──── button

Hypen related talk :

Anchor ──── (নোঙর

href ─ Hypen text reference

Attribute ──

a ── anchor tag ── inline

ctrl ── url
selection

add external and internal fl link

(1—6)

Image

⟨img⟩ ——————→ empty tag, void tag
⟨br⟩ ———————↗ self-cloning tag

unsplash —— free image

src —— favicon —— online / offline
alt ————— image show না-করলে
blink করে phone এর Device
use করলে

HTML form

input ———— void tag

type ———— thene
have multiple
type of input field.

* self closing
অর্থাৎ one অংশ-
এখন — ।

HTML Structure ———

favicon

<IDOCTYPE html>

(1-9)

Summary

* HTML — what is it?
* HTML tags
* Doctype
* comment
* favicon
* heading
* attribute
* inline ———— block line
* file download ———— make file downloadable
* height/width of image
